

# Unlock your supply chain

With Flex Hub, go about your business as usual. Ship your cargo normally, store it closer to key markets and deliver when the time is right.

Today's market reality makes it critical that you remain in control of the destination and speed of your shipment at all times. However, your deliveries still need to happen at the lowest possible costs.

Flex Hub is our new solution that lets you manage your cargo flow in line with your demand patterns. It enables you to store your goods closer to key markets until the time is right for you to deliver the order. You can then transport your goods directly from our hub port with unmatched speed and reliability to the destination of your choice.

### What Flex Hub offers:

#### Provides agility & faster time to market

Up to 70% reduction in 'order to delivery' lead times. Get the flexibility to change the final destination and the agility to deliver faster to your customers directly from the hubs.

#### Puts your customers within reach

Position your cargo closer to key markets with our eight (8) hub ports. Flex Hub is available in Balboa, PA, Salalah, Tanjung Pelepas, Port Said, Algeciras, Port Tangier, Colombo and Bremerhaven Terminal.

[Please refer to the map below.](#)

#### Manages demand fluctuations

Slowdown inflows of your cargo to meet changes in demand. Ship your goods now, and we'll store it for you in one of our hub ports.

#### Offers online visibility

You get complete visibility to monitor real-time inventory levels and your storage time through online dashboards. Further, your Maersk account manager is your single point of contact on all matters.

#### Optimises supply chain costs

Our hubs reduce storage costs by nearly 30% in comparison with traditional warehouse facilities and with reduced working capital.

#### Relieves pressure on storage facilities

Save precious storage space at your facilities during these challenging times. We will deliver your cargo to its destination when the time is right.

#### One contract

You can easily add Flex Hub to your long-term contract. Just select the hub port you wish to use and get started.

**Our Flex Hub locations:**

**How Flex Hub works:**

**1. At Origin:**

Make your booking with Maersk to a destination as planned. Please inform us at time of booking that your cargo needs Flex Hub.

**2. When Sailing:**

Receive real-time updates of your cargo from the time your containers leave for the transshipment hub.

**3. At the Hub Port:**

Your Maersk representative helps manage the holding of containers across our multiple hubs. After the cargo reaches your hub port of choice, we hold it on your behalf until you decide its final destination and when you want it delivered.

**4. On the way to the final destination:**

When you have chosen the time and the last delivery location, we will complete the delivery. All potential places for the final destination must be a part of the contract.

To know more about Flex Hub, please visit our website or call your Maersk sales representative.
