

Blue Seas Adjusters

The vessel “**ARCHIMIDIS**”, having loaded containers in various ports in China and then Korea destined for ports in Panama, Savannah, Norfolk and NY, sailed from Pusan on 18th October and was heading towards the Panama Canal when she suffered a main engine failure.

Salvage services have been requested by the vessel’s owners and are being provided by **Five Oceans Salvage** under Lloyd’s Open Form. **Five Oceans, the Salvors**, are responsible for the salvage of the vessel and her containers/cargo on board. The rescue tug is en route to the vessel where her ETA is the 16th of November 2021. The intention is to tow the vessel to Panama.

At this juncture, the cargo, insofar as we know, is undamaged.

The Salvors have appointed Marine Adjusting Solutions, Greece: -

MARINE ADJUSTING SOLUTIONS INC.
22, Laodikis Street, Glyfada, 166 74, Greece
