

Be ready for  
warehousing that  
keeps you moving

Well-connected and comprehensive,  
our new Panama facility lets you go **all the way**.

## Now, new opportunities are within reach

Do you have optimal stocks to meet demand? Well, that's half the job. Getting to key markets on time is the other critical aspect.

Our newest warehousing facility at the Colon Free Zone in Panama streamlines incoming cargo with its proximity to the Balboa and Manzanillo ocean terminals and the Tocumen airport. It also offers vertical-specific value-added services that lets you get to your markets quickly, while also connecting you with ease to the 76-km Panama Canal Railway.

This way, you not only deliver to existing markets on time, but you also acquire the capability to reach new consumption centres and expand your customer base across the Americas.

# Why choose Maersk for your business

With years of experience in delivering value for regional and global customers, our warehouse is built to support the following verticals:

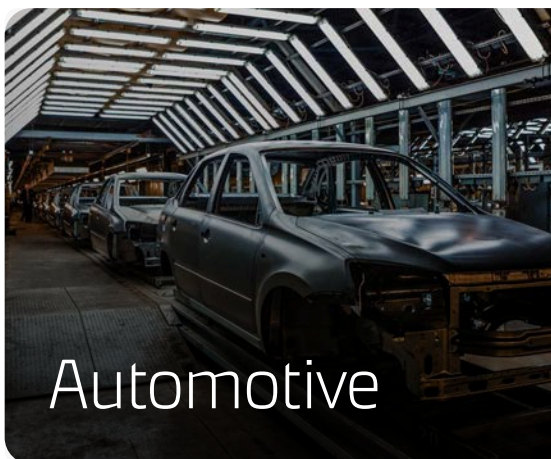

Lifestyle

- Advanced Warehouse Management System to manage inventory better and resolve concerns like overflow
- Multimodal connectivity to get to regional and international markets faster
- Faster, simpler customs processes that are powered by integrated logistics

Technology

- Direct connectivity from Asia for high-volume, fast-moving products
- Strategic location opens up markets across Latin and North America
- Proximity to markets reduces inventory, costs, and lead time

Automotive

- Special Economic Zone (SEZ) advantage makes imports easier and simpler
- Better connectivity improves speed to market and faster regional distribution
- Multimodal connectivity reduces dependence on expensive air freight
